

Here is your EcoAsset

There are many sides to it  
more than meet the eye

So lets start with what you  
can see

These two photos show the 'where  
and when' of the biochar

When you buy one of these  
you know that no-one else  
can ever have the same one

We're going to explain why

Someone made some biochar

You'll have to look up  
for yourself  
why biochar helps.

We took Real Time  
Measurements

Lots of them!

We filled out  
paper work with the  
who did  
what did  
when did's

The removal  
was approved  
by internationally  
reputable auditor  
SGS

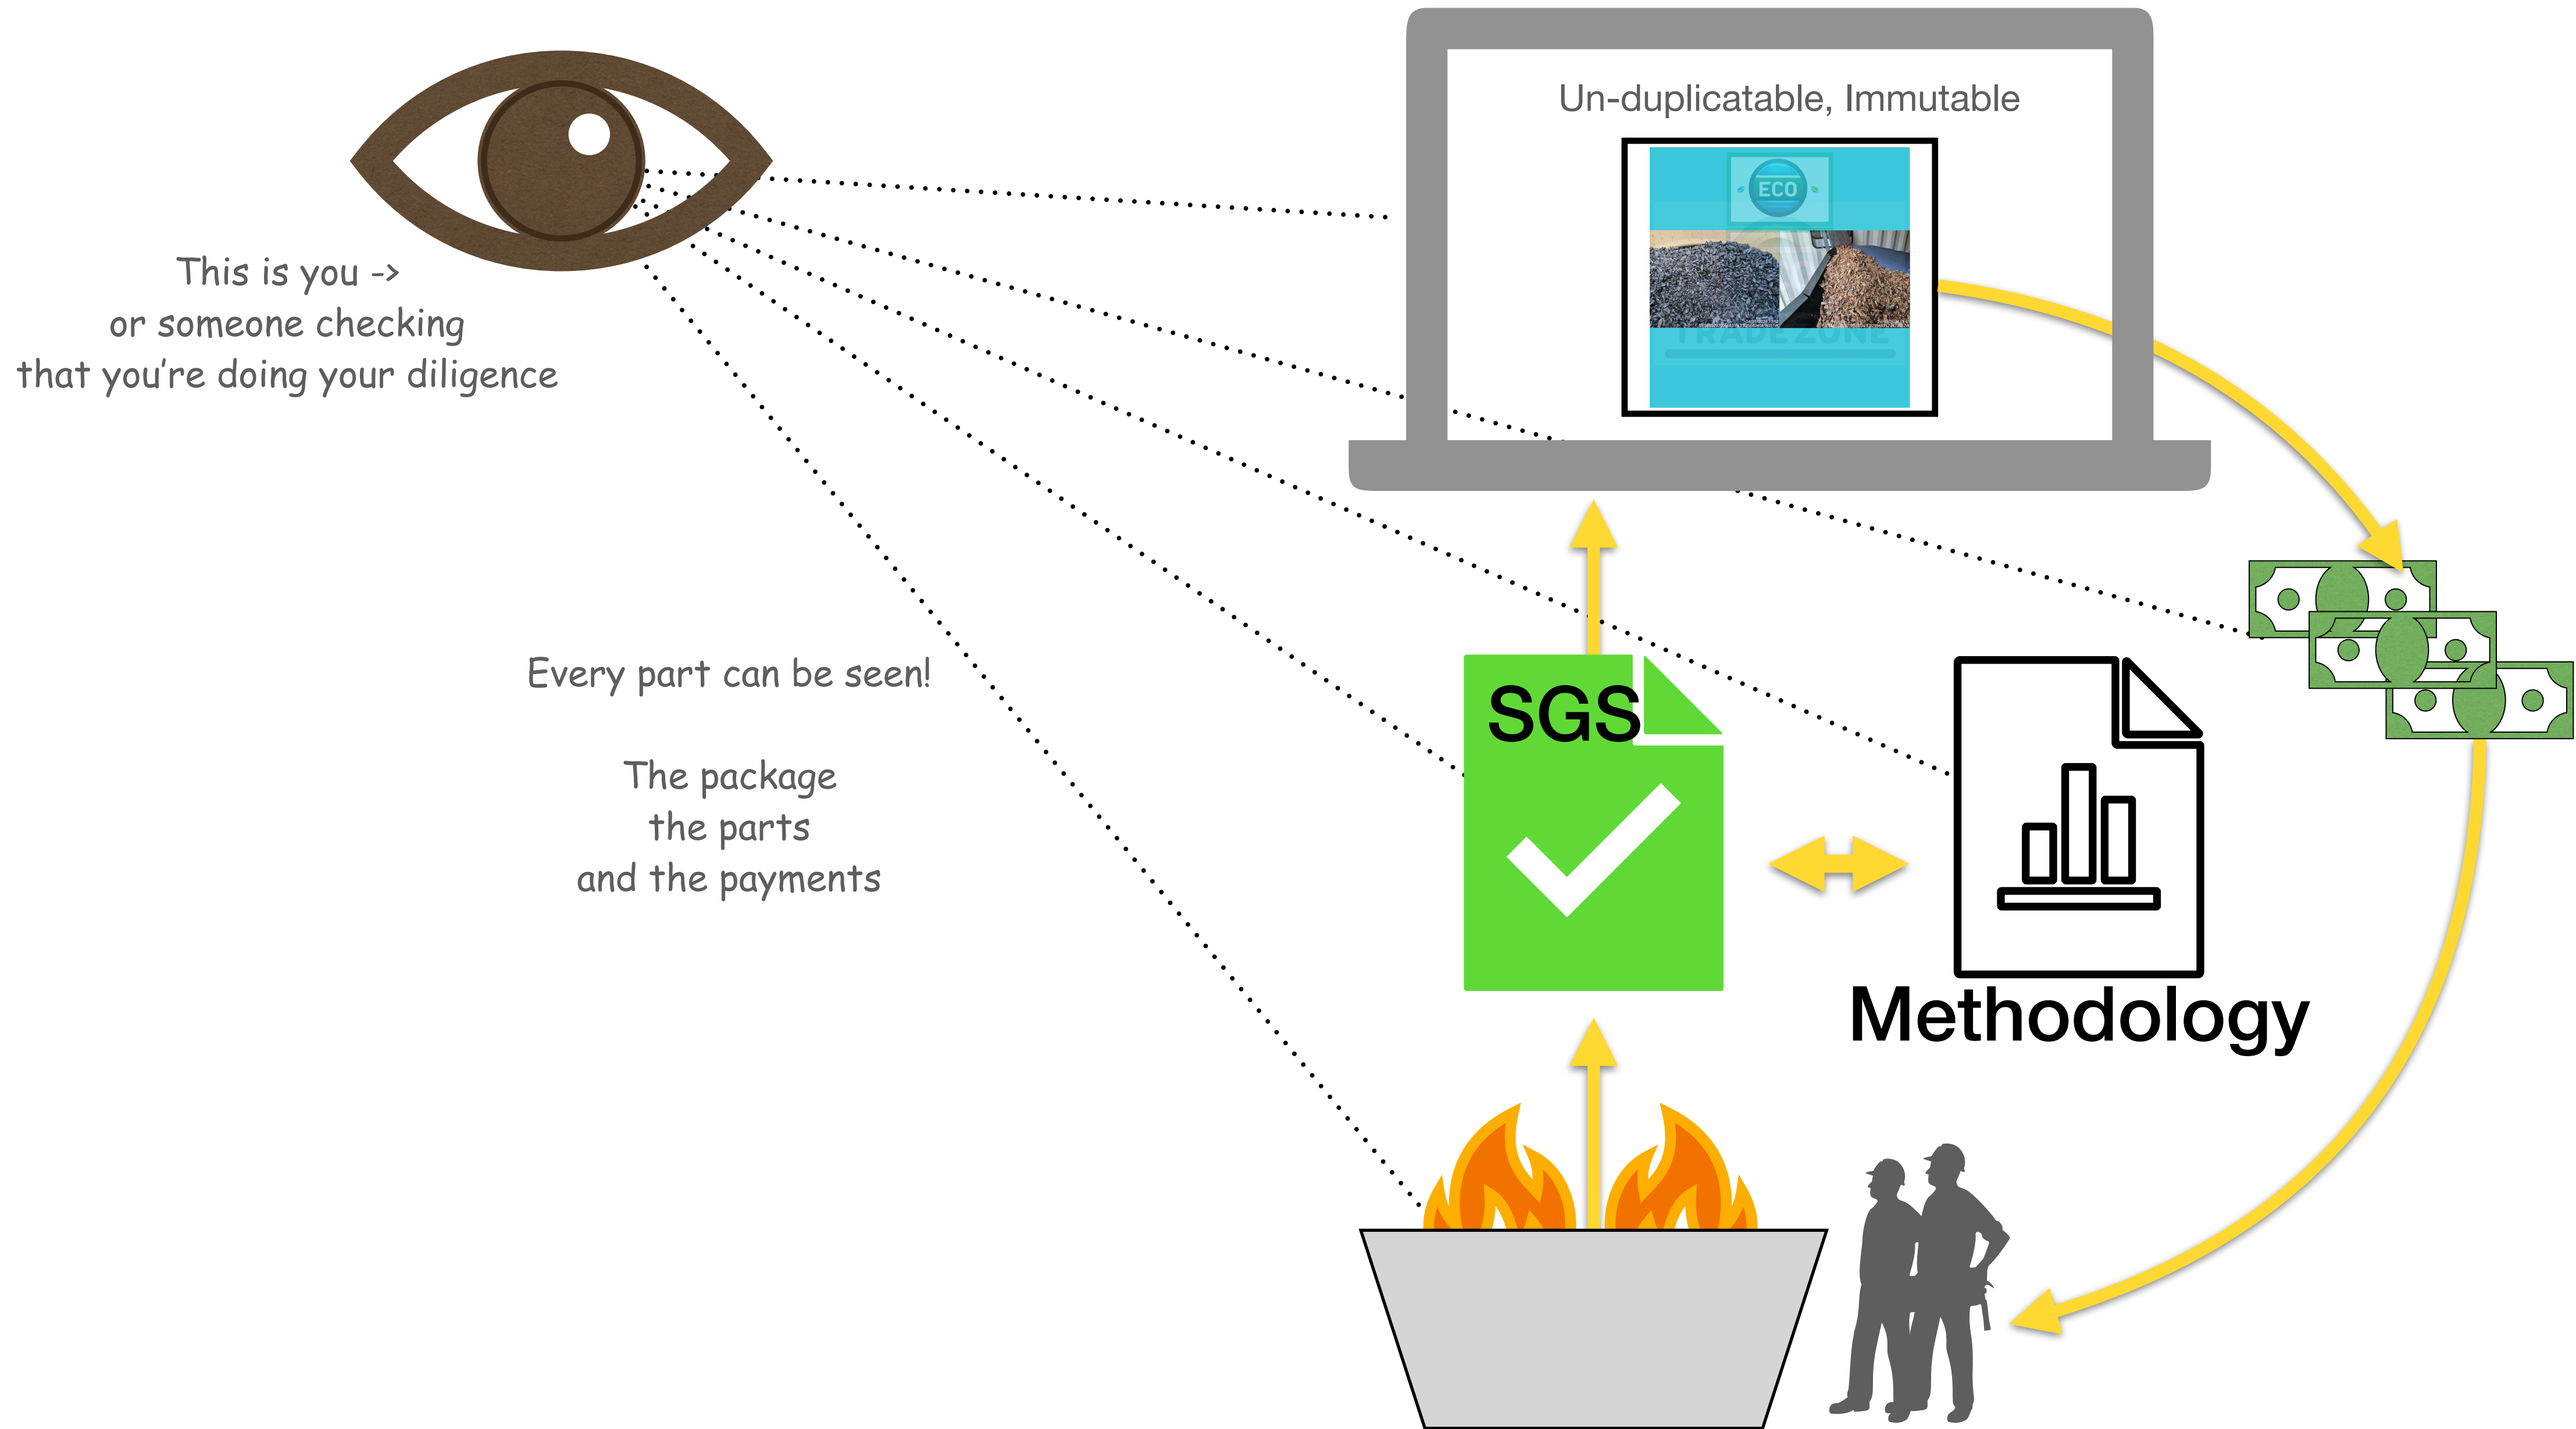

that we had satisfied  
every part  
of the biochar  
production, measurement,  
and reporting methodology

Hold the applause please.

And because no part  
of this process  
ever left our sight

You can buy the one  
and only  
tonne of carbon removal\*  
that will ever exist  
from this particular  
process of making  
Biochar

But lets take a look under the hood

Every 'NFT' or... say, visual asset  
on the blockchain has a bunch  
of things behind the picture

And all those things,  
you lay claim to  
when you buy one

Plus - NFT's have History,  
and there's only one approved  
'minting' address (that makes EcoAssets)  
which is also the  
only address  
that can post on EcoTrade Zone

## UNDER THE HOOD

{ID, Producer Wallet,  
Audit No., Picture Link}

This is the collection of parts  
that makes your EcoAsset  
a one off

TADA!

ID:

The ID shows its' the next in numerical order  
no number is skipped or repeated

Producer Wallet:

This is the crypto wallet of  
whoever worked to make  
the biochar

OR

The collective of site creators  
(still including the person who made it)

Audit No.:

This is the one off audit number  
that was given when the audit  
of the information  
was signed off  
(you'll find out more about  
what that contains below)

Picture link:

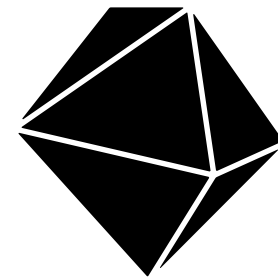

The picture works as the glue with the  
time, date, and location, same as the audit.

You need to take care of it, actively  
[https://www.youtube.com/watch?v=FFNF0RX2O\\_k](https://www.youtube.com/watch?v=FFNF0RX2O_k)

Now we don't want you to have to  
run around finding your information every time

So we've included it in the text under the hood

Here you go:

Audit Date Start  
Audit Date End  
GPS of biochar production  
GPS of biochar usage  
Auditor Name  
Lab Result  
Lab Name  
Biochar Use  
Sustainability reason  
and Approver  
Additionality = Approved

The science says a tonne of carbon has been removed

The process and data has been audited that it met the science

No-one else can ever have\* it because we made it here,  
as an EcoAsset, for you to buy

But still... read this below

The pictures on the EcoAsset show Production and Usage

European Union concept of additionality  
document:

[https://www.europarl.europa.eu/RegData/etudes/note/join/  
2012/433785/EXPO-DEVE\\_NT\(2012\)433785\\_EN.pdf](https://www.europarl.europa.eu/RegData/etudes/note/join/2012/433785/EXPO-DEVE_NT(2012)433785_EN.pdf)

Your EcoAsset has been audited as having 1 tonne of carbon  
removed against the Distributed Biochar Methodology:

<https://www.c-go.com/about>

When you own EcoAssets you can redeem them on the Redeem  
page. This permanently removes their intrinsic value and allows  
you to say you have removed it from your carbon footprint.\*

\*We don't make the laws, so we cannot guarantee that this  
removal would be acceptable by the measurement you are being  
evaluated against for carbon removals. What we provide you is an  
unduplicateable proof of work done, measured in real time,  
proving high quality biochar was made.
